

Full stack technology refers to the entire depth of a computer system application, and full stack developer straddle two separate web development domains : the front end and back end. Front end developer work to optimize the visible parts of an application for web browser and mobile devices.

MERN stack expands ReactJS ,NodeJS, ExpressJS, MongoDB.

Express and node make up the middle(application) tier . express>js is a serverside web framework, and Node.js the popular and powerful JavaScript server platform. MERN is the ideal approach to working with Javascript and JSON ,all the way through.

http

hypertext transfer protocol

message are formatted based on this protocol

it is an application layer protocol using which you can share hypermedia such as html
